

# ABBHI KUMAR SINGH

Computer Science Engineer | AI/ML • Android

+91-9632070071 • [singhabbhi08@gmail.com](mailto:singhabbhi08@gmail.com) • [linkedin.com/in/abbhi-kumar-singh](https://linkedin.com/in/abbhi-kumar-singh) • Bangalore, India

## PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (May 2026) with expertise in AI/ML, Android development, and web technologies. Built a real-time pose detection model achieving 98% accuracy, a travel e-commerce platform with REST API integration, and production Android applications. Proficient in Python, Java, React.js, and SQL; certified in AWS, Generative AI, and Agile. Proven leader as team captain and hackathon finalist.

## TECHNICAL SKILLS

|               |                                                                                     |
|---------------|-------------------------------------------------------------------------------------|
| Languages     | Python, Java, C, SQL                                                                |
| Frameworks    | React.js, Next.js, MediaPipe, OpenCV, Android SDK                                   |
| AI / ML       | Supervised Learning, Random Forest, Pose Estimation, Computer Vision, Generative AI |
| Cloud & Tools | AWS (Certified), Git, Netlify, Power BI, REST APIs                                  |
| Methodologies | Agile/Scrum, Technical Documentation, Requirement Gathering                         |

## PROFESSIONAL EXPERIENCE

### Android Application Developer | MindMatrix

Feb 2026 – Present

- Developing and maintaining scalable Android applications with focus on performance, usability, and modular architecture.
- Collaborating with cross-functional teams through Agile sprints — driving requirement analysis, debugging, testing, and deployment.
- Integrating REST APIs to connect mobile front-end with backend services, improving data consistency and response times.

## KEY PROJECTS

### ZenPose – AI/ML Yoga Pose Detection & Correction — Python, MediaPipe, OpenCV, Next.js

Jan – May 2025

- Built a real-time pose detection and correction system using MediaPipe + Random Forest classifier, achieving 98% accuracy on Surya Namaskara sequences.
- Designed a live joint-angle deviation pipeline delivering audio-visual corrective feedback with sub-100ms latency via a Next.js web interface.

### ExploreX – Travel & Hotel Discovery Platform — React.js, REST APIs, CSS3, Netlify

Aug – Oct 2024

- Developed a travel e-commerce platform with dynamic routing for 50+ destinations, each showcasing curated hotel listings with search and filter functionality.
- Integrated REST APIs for real-time hotel inventory; deployed on Netlify with lazy loading and code splitting, achieving a 90+ Lighthouse performance score.

### Real-Time Object & Color Detection System — Python, OpenCV

Mar – Apr 2024

- Engineered a computer vision app for live webcam-based object and color detection using HSV masking and contour detection; applied in robotics and education demos.

## EDUCATION

### B.E. in Computer Science & Engineering — Atria Institute of Technology (VTU), Bangalore

CGPA: 8.2 / 10 | May 2026

## CERTIFICATIONS

|                                                        |          |
|--------------------------------------------------------|----------|
| AWS Solutions Architect — Infosys Springboard          | May 2025 |
| Applied Generative AI — Infosys Springboard            | Oct 2024 |
| Introduction to Data Science — Infosys Springboard     | Jun 2025 |
| Agile Scrum in Practice — Infosys Springboard          | Sep 2025 |
| Java Concepts & Basics of Python — Infosys Springboard | Feb 2024 |

## AWARDS & LEADERSHIP

- Top-7 Finish — Inter-college Hackathon for innovation and problem-solving.
- Captain (2025): Led football team to VTU Central Division Tournament runners-up. Vice-Captain (2024): Won the championship.
- Core Organizer — College-level technical events; managed logistics and cross-team coordination.
